## TABLE OF CONTENTS

<b>Preliminary remarks</b> .....	7
<b>Overview of important physical units necessary for understanding</b> .....	9
<b>Short entry</b> .....	11
(then, if necessary, continue with chapter “Effect of ionising radiation on humans”)	
<b>The types of radiation and the electromagnetic spectrum</b> .....	14
<b>Ionising (radioactive) radiation, definition, units</b> .....	17
<b>X-rays</b> .....	24
<b>Effect of ionising radiation on humans</b> .....	26
<b>Cellular and sub-cellular effects of ionising radiation</b> .....	30
<b>Radioactivity in the environment, natural and man-made radiation exposure</b> .....	31
<b>Radiation exposure in medicine</b> .....	36
<b>Radon and its decay products</b> .....	43
<b>Food contamination</b> .....	49
<b>Smoking</b> .....	51
<b>Nuclear weapons testing and reactor accidents (Chernobyl and Fukushima)</b> .....	52
<b>A different look at radioactivity</b> .....	56

---

<b>Non-ionising radiation</b> .....	63
<b>Terahertz beams</b> .....	64
<b>Constant magnetic and electric fields</b> .....	65
<b>Alternating electromagnetic fields</b> .....	72
<b>Low-frequency electromagnetic fields</b> .....	73
<b>High-frequency electromagnetic fields</b> .....	75
<b>Biological effects of high-frequency electromagnetic fields</b> ...	77
<b>Does electromagnetic radiation make people ill?</b> .....	79
<b>Influence of mechanical vibrations on humans</b> .....	86
<b>Noise and noise effects (sound)</b> .....	88
<b>Ultrasound</b> .....	91
<b>Infrasound</b> .....	93
<b>Concluding remarks</b> .....	95
<b>References</b> .....	96
<b>Further reading</b> .....	99
<b>Acknowledgement</b> .....	100
